CAREER OBJECTIVE

Motivated Java Full Stack Developer fresher with hands-on experience building responsive web applications using Java, Servlets, JSP, JDBC, MySQL. Proficient in OOP principles, Data Structures, REST API integration, and workflow automation. Demonstrated ability to deliver measurable results through internship experience, reducing manual processing time and improving operational efficiency. Seeking a Java Developer role to contribute clean, scalable code to innovative software projects.

SKILLS

- **Languages:** Java, SQL
- **Backend:** Java, Servlets, JSP, JDBC, Spring Boots
- **Database:** MySQL
- **Core Concepts:** Object-Oriented Programming, Collections, Exception Handling, Data Structures.

EDUCATION

• SETHU INSTITUTE OF TECHNOLOGY	B.Tech CSBS	8.1	2021 – 2025
• MANGAYARKARASI HR.SEC.SCHOOL	HSC	70.33%	2020 – 2021
• OCPM GIRLS.HR.SEC. SCHOOL	SSLC	59.2%	2018 – 2019

INTERNSHIP

- **Full Stack Developer Intern** - Infography, Madurai *April 2025 – August 2025*
- Designed and deployed responsive full-stack web applications using Java Servlets, JSP, JavaScript, and MySQL, reducing manual data handling time by ~30%.
- Integrated OpenAI API to automate content generation pipelines and a customer-facing chatbot, cutting support response time by an estimated 40%.
- Built N8N workflow automations that eliminated repetitive manual tasks, improving cross-team delivery efficiency and accelerating release cycles.

PROJECTS

PG Management System | Java, Spring Boot, Spring Data JPA, MySQL

- Developed a PG management application using Spring Boot with CRUD operations for user and PG-related data.
- Implemented CRUD operations and REST APIs for managing application data.

FinTech Expense Tracker Web Application | React.js, HTML5, CSS3, JavaScript

- Developed a responsive single-page expense tracking application using React.js with reusable components for transaction management, budget tracking, and financial dashboards.
- Implemented dynamic data visualization for expense monitoring, ensuring seamless cross-device responsive web design across desktop and mobile platforms.

Primary Health Care System | Python, HTML5, CSS3, JavaScript, MySQL

- Built an end-to-end patient health monitoring full-stack web application with predictive diagnosis functionality, achieving high classification accuracy on test datasets.
- Processed and analysed patient datasets using Pandas and NumPy; delivered actionable health insights through a dynamic MySQL backed dashboard interface.

CERTIFICATIONS

- Java Full Stack Development Certification - SLA Institute

ACHIEVEMENTS

- Secured 2nd Prize in Techy Fighter, an inter-college technical competition, demonstrating strong problem-solving and algorithmic thinking skills under time constraints.
- Organised IGNITE, a cybersecurity awareness event for the Cyber Peace Cell at Sethu Institute of Technology, showcasing leadership and event management skills.
